MONDAY 23 FEBRUARY #04

BEHIND THE JOB: Environmental Modelling Scientist

🔍 What do they do?

Environmental Modelling Scientists use data and computer models to study ecosystems, climate patterns, and natural resources. They help predict environmental changes, assess human impact, and provide evidence to support conservation, policy, and sustainable development decisions.

🔍 What are their strengths?

- Analytical and problem-solving skills
- Strong understanding of science and mathematics
- Ability to interpret complex data and communicate findings

📚 How do they get started?

Most start with a bachelor's degree in environmental science, ecology, geography, or a related field. Specialised courses in modelling, GIS, or data analysis can lead to research and consultancy roles.

🚀 Next steps
