MONDAY 26 MAY #16

BEHIND THE JOB: AI Engineer

What do they do?

AI Engineers develop and maintain artificial intelligence systems, including machine learning models and deep learning algorithms. They work across industries such as healthcare, finance, and technology to build AI-powered solutions that automate tasks and enhance decision-making.

What are their strengths?

- Strong programming and data science skills
- Problem-solving and critical thinking
- Knowledge of machine learning and deep learning techniques
- Creativity in applying AI to solve real-world problems

How do they get started?

A Bachelor's or Master's degree in Computer Science, Artificial Intelligence, or Data Science is typically required.

Next steps
